FOR IMMEDIATE RELEASE

Peach Bottom Emergency Siren Test Scheduled for Dec. 7
Sirens to sound for three minutes at 1 p.m.

DELTA, PA (Dec. 1, 2022) – Constellation will conduct its semi-annual, full-volume test of the emergency warning sirens surrounding Peach Bottom Atomic Power Station on Wednesday, Dec. 7 at approximately 1 p.m. This is one of two semi-annual tests performed each year.

The warning siren system consists of 97 sirens located in the 10-mile radius around Peach Bottom Atomic Power Station. The sirens are not a signal to evacuate, but a warning to tune to a local Emergency Alert Broadcast television or radio station. County emergency management authorities activate the sirens.

Peach Bottom Atomic Power Station is located on the bank of Conowingo Pond in York County, Pa. The plant produces enough carbon-free electricity to power more than 2.7 million homes.

About Constellation

Constellation Energy Corporation (Nasdaq: CEG) is the nation's largest producer of clean, carbon-free energy and a leading supplier of energy products and services to millions of homes, institutional customers, the public sector, community aggregations and businesses, including three fourths of Fortune 100 companies. A Fortune 200 company headquartered in Baltimore, our fleet of nuclear, hydro, wind and solar facilities has the generating capacity to power approximately 15 million homes, providing 10 percent of all carbon-free energy on the grid in the U.S. Our fleet is helping to accelerate the nation's transition to clean energy with more than 32,400 megawatts of capacity and annual output that is nearly 90 percent carbon-free. We have set a goal to achieve 100 percent carbon-free power generation by 2040 by leveraging innovative technology and enhancing our diverse mix of hydro, wind and solar resources paired with the nation's largest nuclear fleet.
